691 Weatherproof Keypad

- **For use in exposed, public, and rugged environments**
- **Works with any DMP panel**
- **Audible alarm notification**
- **Silence alarm while system remains armed**

FEATURES

- Rugged enough for industrial and commercial applications
- Weather and vandal resistant
- Large, easy-to-read 32-character LCD display
- Display is protected by coated, scratch-resistant, water-sealed polycarbonate window
- High-impact polymer keys
- Custom 16-character business name

- User-adjustable brightness, tone, and volume controls
- Supports Cancel/Verify™ feature
- Built-in diagnostics for ease of service
- View system events/user activity through keypad display
- Connect a switched ground speaker to the violet wire on keypad for annunciation

- Suitable for access and burglary applications
- Distinct burglary, zone monitor, and pre-warn tones
- Displays time of day, armed zones, and armed areas
- Unique Silence feature allows user to silence alarm while keeping the system armed

THE ALL-WEATHER ALTERNATIVE

The 691 keypad provides all the features and functions of a traditional DMP keypad but is protected by a rugged, protective housing. For commercial installations that require an exterior keypad, the 691 is a perfect choice.

VANDAL-RESISTANT RUGGED EXTERIOR

Besides protecting the internal electronics from the weather, the hardened case and polymer keypad protect the 691 from hard use and vandalism in public installations.

VERSATILE SUPERVISED AND UNSUPERVISED OPERATION

When programmed for supervised operation, the keypad occupies its own unique device address on the keypad data bus. Programming the keypad for unsupervised operation allows you to install an unlimited number of keypads set to the same device address. This increases the possible number of keypads in the system, providing additional installation flexibility.

USER-FRIENDLY MENU FUNCTIONS

Users can quickly browse through menu options to find a desired function or feature. Disarming and Arming functions are fast and easy. All functions allowed by the user's authority level can be accessed through the keypad.

TWO-BUTTON PANIC KEYS

Use the top row of keys for two-button panic functions. Press and hold the appropriate two-key combination to send a Panic, Non-medical Emergency, or Fire report to the monitoring center.

CANCEL/VERIFY™

In systems with either the Home/Sleep/Away or All/Perimeter options, users can CANCEL an alarm or VERIFY that a valid alarm has occurred. Selecting VERIFY manually verifies the alarm and sends an alarm verification message to the monitoring center, eliminating the need for a confirmation phone call.

KEYPAD SHORTCUT KEYS

Keypad shortcut keys simplify operation and allow the user to more quickly Arm, Check in, Monitor, Exit, or Reset the system. One-button arming provides the fastest, simplest keypad operation available. Use the one-button shortcut keys for common functions or use the ATM-style menu to access advanced functions. Users have the flexibility to operate the keypad using whichever method meets their needs or level of expertise.

CUSTOMIZABLE CONTROLS

Users can customize the keypad via the User Options menu with the ability to adjust brightness, speaker tone, and volume.

WORKS WITH ALL EXISTING DMP PANELS

There are no special modules or panel upgrades required to add 691 keypads to an existing system. Install multiple keypads on the same wire run to reduce costs and speed installation.

INSTALLER OPTIONS

The Keypad Options and Keypad Diagnostics menus are available to system installers and service technicians. This makes it easy to perform routine system setup and testing without disabling the system. There's no need for additional, expensive external programmers. Panel and add-on module programming is integrated into the keypad.

Specifications

Operating Voltage	12 VDC
Dimensions	5.76" W × 8.76" H × 2.75" D
Color	Black-powder-coated box
Display Type	LCD
Operating Temperature	+32 to +120°F

Accessories

Keypad Wiring Harness   5-wire harness

Compatibility

Compatible with all DMP panels.

Current Draw

Standby	>75 mA
Alarm	>75 mA

Important terms and conditions

Available in quantities of 24, 150, or 250 only.

6-8 week lead time.

Orders are non-cancellable and non-returnable.
