Two-Way offers increased security
Two-way Supervised Wireless Repeaters and Receivers from DMP deliver unparalleled flexibility and simplicity while processing every system message efficiently.

- Simple programming
- Superior range
- Seamless integration with DMP panels and other hardwired devices

Whether the installation is new construction, an upgrade, or retrofit, Two-way Wireless Repeaters and Receivers from DMP get the job done faster with less effort.

DMP 1100 SERIES
WIRELESS RECEIVERS

SYSTEM FEATURES
- Two-way supervised communication
- Extended range with the 1100DH and 1100XH
- 3-, 60- or 240-minute supervision window; selectable by zone or output to maximize effectiveness
- Frequency-hopping 900MHz Spread-Spectrum technology
- Attractive and durable plastic housing for all units

1100 SERIES RECEIVERS
- 1100D/1100DH/1100DI Receiver for XT Series Panels
- 1100X/1100XH Receiver for XR Series Panels
- 1100R Repeater for XT, XTL, and XR Series Panels
1100 Wireless Receivers

TWO-WAY COMMUNICATION

Superior to traditional wireless devices that just broadcast until the zone is restored. DMP 1100 Series require an acknowledgement from the 1100 Series Receiver, indicating successful communication. This smart technology ensures that each and every communication is received and efficiently processed at the panel.

900MHz SPREAD-SPECTRUM TECHNOLOGY

DMP wireless communication employs 900MHz frequency-hopping spread-spectrum to ensure clear and accurate signal transmissions without interference. Other wireless devices can take up to four hours before the system recognizes a missing device! With Two-way communication, if the receiver misses an expected supervision message, the system immediately reports the zone or output as missing, so your systems integrity and reliability are never compromised.

INCREASED SECURITY

Superior to traditional wireless communication. This smart technology employs Two-way wireless capabilities as the basic 1100D and 1100X models, but with the added power needed for harsh RF environments. The 1100DH installs on the keypad bus of the XT Series panels. The 1100XH installs on the wireless bus of the XR100/XR500 or XR150/XR550 Series panels.

1100D & 1100X RECEIVERS

Competitively priced for residential or commercial applications, the 1100D and 1100X Receivers allow you to add wireless transmitters to DMP panels as easily as adding a keypad. Supporting up to 32 wireless transmitters using the 1100D or up to 500 transmitters using the 1100X, DMP receivers satisfy all wireless applications.

1100DH & 1100XH RECEIVERS

The more powerful 1100DH and 1100XH offer the same Two-way wireless capabilities as the basic 1100D and 1100X models, but with the added power needed for harsh RF environments. These receivers are designed for use with DMP panels and are suitable for either residential or commercial applications.

1100DI RECEIVER

This economical receiver provides the same basic features as the 1100D model but in a more compact unit. The 1100DI connects anywhere on the keypad bus of XT Series panels and is suitable for either residential or small commercial applications.

1100R REPEATER

Extend the communication range of DMP wireless devices with the 1100R Wireless Repeater. Use up to eight 1100R Repeaters with any DMP 1100 Series Receiver system. The plug-in DC power supply is backed up by a 24-hour battery. On-board LEDs provide built-in survey capability to enable single-person installation and eliminating the requirement for an external survey kit. An internal case tamper switch provides device security.

COMPATIBILITY

XTL, XT, and XR Series Panels.
