

an easy feeling

When it comes to alarm systems, homeowners all agree—they want a system that's reliable, easy to see, easy to understand and most of all, one that's easy to use. Thanks to the Thinline™ Series keypads, choosing a system has never been easier!

The stylish Thinline is the perfect blend of technology and aesthetic sensibility. But don't let its good looks fool you—its beauty is more than just skin deep. When an alarm has been activated by an intrusion or fire, Thinline sounds the alarm, changes color, and spells out details on its large, easy-to-read display. With system features like these, the line between functionality and superior design has never been so thin.

large, easy-to-read display clearly spells out the status of your system.

customizable name display can be programmed with up to 16 characters of custom text.

quick, two-button panic keys enable you to easily send police, emergency or fire signals to the monitoring center, all the while protecting against accidental or false alarm calls.

user-friendly controls allow you to easily adjust keypad brightness and volume.

secure and simple

Thinline™ will change your view of security with its sleek and simple design.

large, easy-to-see LED indicator shows the status of your alarm, enabling you to instantly recognize whether your system is powered, and fully or partially armed.

the sleek, stylish design of DMP's Thinline

lends elegance to your home while making viewing easy on the eyes.

LCD displays are available in a brilliant green (Thinline) or cool blue (Aqualite™).

But perhaps the most desirable feature is not its good looks, or its functionality, but its simplicity of use.

easy-to-use menus guide users through an intuitive scrolling system, quickly and efficiently presenting menu options. Easily choose the desired option using the command key, or return one step at a time with the back arrow key. So easy, even a child can do it.

arming made simple! Thinline's unique Home-Sleep-Away feature

allows you to quickly arm your system using select keys. "Home"

arms your perimeter, "Sleep"

arms both perimeter and preset

interior spaces, and "Away" arms

the entire residence. Simple as pushing a button.

remembering access codes can be a thing of the past with

Thinline's optional proximity token—simply wave the token in front of the keypad for quick and easy arming/disarming!
