

277CAN TROUBLE SOUNDER

Installation Sheet

Description:

The Model 277CAN Trouble Sounder is an audible trouble alert.

Compatibility:

XR150/XR550 Canadian Series panels

Processor Fail Alert:

The 277CAN Trouble Sounder monitors the keypad bus to sound an alert whenever the keypad bus is faulted. The sounder also sounds a trouble alert whenever the panel processor is reset using the RESET header or the processor stops functioning.

Installation:

Slide the connector on the sounder onto the panel 893A or 277 connector.

-  *Ground yourself before handling the panel:* Touch any grounded metal, such as the enclosure, to discharge static before touching the panel.
-  *Remove all power from the panel:* Remove all AC and Battery power from the panel before installing or connecting any modules, cards, or wires to the panel.
