INSTALL THE 265LTE

**Caution:** Touch grounded metal to discharge static before handling the XTLplus.

1. Place the antenna onto the 265LTE SMA connector and then twist the antenna until it is securely tightened.
2. Slide the 265LTE into the XTLplus eight-pin CELL MODULE connector, keeping the 265LTE parallel to the XTLplus.
3. Align the standoff hole in the 265LTE with the standoff on the XTLplus, and then snap it into place. See Figure 2.

ACTIVATE THE 265LTE

Cellular service is required before using the 265LTE for signal transmission. The 265LTE comes ready for activation with SecureCom™ Wireless. Use Remote Link™, the Dealer Admin™ site (DMPDealerAdmin.com), the Tech APP™, or call DMP Customer Service (1-866-266-2826) to activate the 265LTE.

**Remote Link Activation**

1. Navigate to Remote Link and select a panel.
2. Select Program in the top menu and select Communications from the drop-down menu.
3. Select Cellular Network as the Communication Type and click Activate.
4. Select SIM as the SIM Type.
5. Enter the SIM number found on the 265LTE label and click Activate.
6. Select a Rate Plan for the 265LTE and click Activate.
Dealer Admin Activation
1. Navigate to the Dealer Admin site (DMPDealerAdmin.com).
2. Click Customers in the right-side menu and select a customer.
3. Click Add System.
4. Enter a System Name.
5. Select XTLplus from the System Type drop-down menu.
6. Select either Cellular or EASYconnect + Cell Backup in the Connection Type field.
7. Enter the SIM number found on the 265LTE label and click Get Status.
8. Enter the Account Number.
9. Select a Rate Plan for the 265LTE.
10. Click Activate Cellular Device.

Tech APP Activation
1. Navigate to the Tech APP.
2. Tap Find a Customer then search for a customer.
3. Tap Add a System.
4. Enter a System Name.
5. Scan or enter the Serial #.
6. Select XTLplus from the System Type drop-down menu.
7. Select either Cellular or EASYconnect + Cell Backup in the Connection Type field.
8. Enter the Account Number.
9. Enter the SIM number found on the 265LTE label then tap Get SIM Status.
10. Select a Rate Plan for the 265LTE.
11. Tap Activate Cellular Device.

TEST THE 265LTE
The panel provides a diagnostic function to test the communication integrity and cellular signal strength of the 265LTE to the nearest tower for the cellular carrier. To use the diagnostic function, reset the panel, enter 2313 (DIAG), and press CMD.

Communication Status
This option tests the individual components of cellular or wireless network communication.
1. Select CELL STATUS from the diagnostic menu. Possible test results are shown in Table 1.
2. Select YES to continue through the remaining component tests or select NO to stop testing and return to CELL STATUS.

Table 1: Communication Test Results

Cellular Strength
This option provides a way to test the cellular signal strength of the nearest tower for the cellular carrier. Follow the steps below to test the cellular strength of the 265LTE:
1. Select CELL SIGNAL from the diagnostic menu then press a select key or area.
2. SIGNAL: displays. The numerical value of the cell signal strength is represented in -dBm. The bars represent the signal strength of the 265LTE and range from 0-7. Zero bars indicate a weak signal and seven bars indicate a strong signal.
FCC INFORMATION
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

The antenna used for this transmitter must be installed to provide a separation distance of at least 20 cm (7.874 in.) from all persons. It must not be located or operated in conjunction with any other antenna or transmitter.

Changes or modifications made by the user and not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Industry Canada Information
This device complies with Industry Canada Licence-exempt RSS standard(s). Operation is subject to the following two conditions:

1. This device may not cause interference, and
2. this device must accept any interference, including interference that may cause undesired operation of the device.

This system has been evaluated for RF Exposure per RSS-102 and is in compliance with the limits specified by Health Canada Safety Code 6. The system must be installed at a minimum separation distance from the antenna to a general bystander of 7.87 inches (20 cm) to maintain compliance with the General Population limits.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes:

1. l’appareil ne doit pas produire de brouillage, et
2. l’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.

L’exposition aux radiofréquences de ce système a été évaluée selon la norme RSS-102 et est jugée conforme aux limites établies par le Code de sécurité 6 de Santé Canada. Le système doit être installé à une distance minimale de 7.87 pouces (20 cm) séparant l’antenne d’une personne présente en conformité avec les limites permises d’exposition du grand public.
